VISUAL FIELD EXAMINATION

A Visual Field Analyzer is a sophisticated instrument that uses a computer to electronically test the functioning of the retina, optic nerve, and part of the brain used for seeing. It provides additional information we have no other way of obtaining. This allows us to provide a more thorough medical evaluation of your eyes and can assist in the detection of many disorders, including glaucoma and brain tumors.

We strongly recommend that all of our patients receive the “screening version” of this exam, and especially anyone with the following:

1. headaches
2. diabetes
3. high blood pressure
4. circulatory problems
5. family history of glaucoma
6. strong eye glass prescription
7. history of head trauma
8. seeing spots or light flashes

There is a \$15.00 charge in addition to the regular examination fee if you choose to have this screening. This \$15.00 may not be covered by your insurance.

Please check the appropriate line below and sign at the bottom.

_____ I DO want the Visual Field Exam.
